Station 1: Medication Administration
Station 2: Head to Toe Assessment
Station 3: Oxygen Delivery Devices
Station 4: Epic inpatient login, use of flowsheets, Rover capabilities

Station 5: DKA
Station 6: Ventilator Management
Access and Check Out

After the surge training session, nurses deployed to assigned unit for same-day share time

Progressive clinical shifts scheduled after initial training date

CNE team members rounded on surge trained nurses (using standardized questions) during clinical shifts to assess need for additional clinical time and to determine ability to function as primary RN:

- Primary RN with full assignment
- Primary RN with smaller/lighter assignment
- Cannot act as Primary RN (cannot take an assignment interpedently). Assist a Primary RN.
