

# SIMX

The Next Generation of VR Training Simulation

The **most advanced** simulation product on the market at less than **1/10th the cost** of traditional simulation

#### Increased Realism

SimX's software allows you to reproduce patient presentations with **unprecedented visual fidelity**—from hemorrhaging amputations to febrile seizures and everything in between.

#### Virtual Environments

SimX improves training by **simulating emergency settings, clinics, or even moving helicopters**. Modify scenes to prepare for worst-case scenarios like codes, violent family members, natural disasters and more.

#### Convenient Multiplayer

SimX brings multiple trainees—regardless of location—to the same virtual environment. With **less than 5 minutes of set-up time**, turn any space into a sim center.

#### Customizable Content

SimX boasts more than **70 patients, 40 environments, and 300 tools**. At use in more than **400 global institutions**, SimX is one of the largest VR educational tools on the market.
