

## GIVE YOUR LEARNERS THE BEST PRACTICE<sup>SM</sup>

Sentinel U<sup>®</sup> is a leading provider of health care simulations and learning innovations for healthcare professionals. A full portfolio of healthcare simulations provide several powerful ways to complement your training. Streamline and enhance your workforce development with virtual simulations grouped by practice area – from telehealth patient care to interprofessional teams, where critical thinking and nursing care scenarios for multiple modalities can be practiced repeatedly.

### WITH SENTINEL U<sup>®</sup>, YOUR LEARNERS CAN:

Engage in realistic patient encounters across healthcare settings

Access virtual simulations on-demand anywhere and anytime

Practice in a risk-free environment

Get real-time feedback with rationales

Sharpen clinical reasoning, decision-making skills, and critical thinking competency

Boost confidence and learning outcomes

JOIN OUR 200+ CLIENTS RESULTING IN MORE THAN  
130,000 LEARNER EXPERIENCES ANNUALLY.

## SENTINEL U® PRODUCTS

### Prioritization of Care® - Hospital

Features 40 unique patients with symptoms ranging from early stage heart failure and respiratory distress to orthopedic pain and depression. Learners first record vital signs, interview, then chart observations and rationale in SBAR format. Then prioritize patients for treatment.

### Prioritization of Care® - Clinic

Features 50 unique patients with a significant focus on mental health/psychiatric, drugs/alcohol and women's health patients. Includes highly requested settings including a behavioral health clinic, home clinic, jail clinic, women's health clinic and a pediatric clinic.

### Prioritization of Care® - Specialty Series

Choose from virtual simulations in 10 different settings: Adult Medical Care, Advanced Med/Surg, Antepartum/Intrapartum, Geriatrics, Mental/Behavioral Health Acute Care, Mental/Behavioral Health Chronic Care, Pediatrics Acute Care, Pediatrics Chronic Care, Postpartum/Neonatal Care and Adult Surgical Care.

### Patient Management and Delegation®

A virtual simulation where nurses act as charge nurses, and practice making management and delegation decisions based on hand-off reports and other information.

### Nursing Quality Indicators®

A virtual simulation where nurses care for various patients across five levels and predict the impact of clinical judgments and nursing decisions.

### Interprofessional Teams®

A virtual simulation series designed for healthcare leaders, practicing nurses and nursing students who are sharpening their collaboration and communication skills.

### Telehealth™

Four virtual simulations that teach nurses to assess, evaluate and monitor patients remotely. Choose from four different settings: Medical/Surgical, Maternal/OB, Pediatrics and Mental/Behavioral Health.
