Respirology

“ CyberPatient allowed me to take control over the whole continuum of care and not only the diagnosis or the treatment part. This approach broadened my understanding of the intricacies of healthcare besides deepening my clinical competencies and reflexes. ”

- Dr. Saad CHAIBI, Morocco -

Public Health Officer, WHO; former Vice President for Public Relations and Communications, IFMSA; former National President, IFMSA Morocco.

Memorable Learning Experience

- **Boost your clinical confidence** in preparation for rotations, OSCE's, residency, and other medical licencing examinations.
- **Sharpen your decision-making skills** throughout the continuum of care on a self-driven, gamified platform.
- **Support your memory retention** abilities as you explore and revisit cases covering all organ systems.

Engage in your Education

- **Practice treating multiple medical conditions**, determine treatment plans and better understand impacts on the healthcare system.
- **Experience different outcomes** and the consequences of your decisions in a safe and ethical environment.
- **Receive multiple forms of feedback** to help identify your mistakes now to prevent errors in the clinic.

Knowledge Anytime, Anywhere!

- **Improve your quality and breadth of knowledge** anytime, anywhere!
- **Advance as a student and clinician** inside a virtual hospital with more than 120 patients available on demand.
- **Easily access 750+ additional Educational Resources** including curricular modules, videos, lectures, and more at your fingertips.

Challenge Yourself

A **FREE** account gives you access to 13 unique cases including 3 x COVID-19 specific cases.
